

 iPort[®]

The world's first multi-room digital media system for iPod[®].

ShareMusic® ShareVideo

iPort, the inventor of in-wall iPod docking systems, continues to enhance the ability to share music and video through in-wall and free-standing devices. Patented iPort technology allows an iPod or iPod touch® to become part of an entertainment system and seamlessly integrate into virtually any environment, from homes and businesses to restaurants and hotel rooms.

With an iPort system installed, you are freed from the constraints of headphones and miniature speaker systems. Music, video, and photos are enjoyed through your existing speaker system and television while your iPod conveniently charges. iPort also integrates easily with advanced automation control systems so your iPod may be controlled remotely.

Please visit www.iportmusic.com/integration/partners to learn more about how iPort can be professionally integrated into your lifestyle.

At home and at work, in day spas, luxury hotels, and nightclubs, iPort is extending the reach of the iPod revolution to speakers and screens around the world.

The iPort In-Wall Series

iPort in-wall docking systems are available in different models to provide the perfect solution for any application. From a simple one-room set-up to a sophisticated entertainment system in multiple rooms, the In-Wall (IW) Series can be conveniently installed in any wall location to complement room layout and furnishings.

iPort IW-20 is the ideal choice for music playback in a single room. Audio is delivered up to 30 feet (9m) from the iPort.

iPort IW-21 adds the convenience of IR (infrared) remote control and composite video capability for your iPod. Audio and video upgrade kits are available to increase the delivery of audio up to 500 feet (152m) and video up to 250 feet (76m).

iPort IW-22 is designed with an integrated RS-232 control port to enable two-way communication and control of the iPod via a compatible control system. IW-22 integrates easily with the most popular home entertainment control systems. iPod menu information, including songs, artists, movies, and TV shows may be displayed on the touch panels and compatible remote controls. Audio output is balanced, allowing IW-22 to be used in multi-room situations where distances between the iPort and main audio components can be up to 500 feet (152m). An optional upgrade kit increases video delivery up to 250 feet (76m) from the iPort.

A choice of accessories to extend the power of iPort

From IR controls to balanced audio and balanced video upgrade kits*, our wide selection of accessories makes it easy to integrate in-wall and free-standing digital systems in any environment.

For a complete list of accessories, visit iportmusic.com.

*Audio and video upgrade kits are available to increase the delivery of audio up to 500 feet (152m) and video up to 250 feet (76m).

The iPort Free-Standing Series

The iPort free-standing docks offer convenient features and easily connect with all home entertainment systems. The sleek, elegant design of the Free-Standing (FS) Series blends beautifully into any location.

iPort FS-21 has IR control that has play back audio and video iPod content in a single room where the audio system and television are within 30 feet (9m) of the FS-21.

iPort FS-22 provides all the features of the FS-21 with the addition of integrated RS-232 control to enable two-way communication and control of the iPod using compatible control systems. iPod menu information, including songs, artists, and movies, can be displayed on touch panels and compatible remote controls.

iPort FS-23 adds full on-screen functionality, allowing users to browse content, control playback, adjust volume, and customize iPod settings via an elegant and intuitive interface on TVs and home theater screens. The iPort remote control provides access to digital media from anywhere in the room.
